## Hard skills

### Languages:

Python, SQL, DAX

### Data Engineering:

Kafka, Spark, Airflow, ETL/ELT  
Pipelines, Data Modeling

### Business Intelligence:

Power BI, DAX, Power Query,  
Power BI Service, Excel

### Databases:

SQL Server, PostgreSQL,  
MySQL, MariaDB

### Cloud & Infrastructure:

Google Cloud BigQuery,  
Microsoft Power Platform,  
Microsoft Fabric, Dataflows,  
Docker, Docker Compose

### Data Processing:

pandas, PySpark, Power Query

### Version Control:

Git, GitHub

## Language

Lithuanian - native  
English - fluent

# Jokūbas Griežė

Junior Data Engineer | Data Analyst

## Professional Summary

Data Science and Engineering student at Kaunas University of Technology with hands on experience in data engineering, business intelligence and analytics. Completed a Data Analyst internship at Prodivi, working with SQL, Power BI, DAX, data models and reporting logic. Interested in data engineering/ analytics, data warehousing and reliable data solutions for business decision-making.

## Education

### 2023 - to date

#### Kaunas University of Technology

#### Data science and engineering

Coursework focused on data engineering, databases, statistical analysis, and machine learning. Worked with Python and SQL for data processing and analysis.

## Experience

### May 2026 – July 2026 Intern Data Analyst

#### PRODIVI, UAB

- Worked on **SQL and Power BI**-based business intelligence solutions for client reporting projects.
- Designed **database** structures with **ETL** logic.
- Fixed **database and DWH structures, data models, relationships** and reporting logic.
- Created **DAX** measures, validated calculation logic.
- Supported improvements to **Power BI** report models
- **Communicated** with clients to clarify reporting requirements and data-related questions.

## Projects

### AVAX Streaming Data Pipeline

Built a real-time crypto data pipeline ingesting live Binance trades via Kafka, processing with Spark Structured Streaming, orchestrated by Airflow, and loading analytics into BigQuery. Fully containerized with Docker Compose.

[View on Github](#)

#### Tools:

- Python
- Apache Kafka + ZooKeeper
- Apache Spark
- Apache Airflow
- Google BigQuery
- Docker Compose

### News Ingestion Search Pipeline

Built an end-to-end data engineering pipeline for automated news ingestion, ETL processing, embedding generation, and semantic search. Implemented a queue-driven, idempotent crawling system with scalable batch processing and containerized deployment following production-style data architecture principles.

[View on Github](#)

#### Tools:

- Python
- Docker,
- Scrapy (web crawler),
- MariaDB,
- PyMySQL

### NYC FHV Trips Power BI Dashboard

Built an interactive Power BI dashboard for NYC for-hire vehicle trip analysis. Created a star-schema data model, report pages, KPI cards, time trends, company comparisons and DAX measures for trip, fare and driver earnings analysis.

[View on Github](#)

#### Tools:

- Power BI
- DAX
- Power Query
- Dataflow Gen-1
- Data modeling
